

## Pharmacy Crime Prevention – Member Benefit through 3SI

Pharmacists Mutual is excited to introduce our members to 3SI's **PharmaTracker®**. The covert tracking device detects motion and uses GPS, cell, and radio frequency to automatically and silently notify 3SI and local law enforcement that a burglary or robbery occurred.

What are the costs? We have partnered with 3SI to provide **PharmaTracker®** to Pharmacists Mutual members at an exclusive **15% discount**. The discount reduces the initial cost of installation and one year of monitoring from \$864 (\$425 for the device, \$264 monitoring service, \$75 DIY install fee, and \$30 for a charger), to \$734. Year 2 and beyond will require a \$250 annual service monitoring fee. Three-year leasing options are available for \$42/month, plus a \$75 DIY install fee. Leasing includes automatic technology upgrades as they become available.

### The Tracking device:

- Proven to be effective in locating and apprehending criminals; 70% apprehension rate
- Fully automatic and silent; works on motion and tilting
- Covert design that makes it undetectable; blends in among other pharmacy packaging
- Provides location "ping" updates every 6 seconds
- Features do-it-yourself installation and charging

Order by email: [info@3si.com](mailto:info@3si.com)

Provide the Pharmacists Mutual discount code - **PHMIC**

Should a burglary or robbery occur, report the claim to Pharmacists Mutual and indicate that you had a tracking device on site. Pharmacists Mutual will contact 3SI to verify the device was active with a current maintenance agreement. Your property deductible, up to \$1,000, will be waived for burglary and robbery losses covered under the policy.
